

# SPECIAL LOCAL NEED SECTION 24(c) SUPPLEMENTAL LABELING

## **Fyfanon® ULV AG**

### ULTRA LOW VOLUME CONCENTRATE INSECTICIDE

FOR DISTRIBUTION AND USE ONLY WITHIN OREGON ON HYBRID POPLARS GROWN FOR PULP OR WOOD (AERIAL APPLICATION)

EPA Reg. No. 67760-35

EPA SLN No. OR-080024

This label is valid through December 31, 2013 or until otherwise amended, withdrawn, canceled or suspended

#### ACTIVE INGREDIENT:

Malathion\*\*..... 96.5%

OTHER INGREDIENTS ..... 3.5%

TOTAL..... 100.0%

\*\*O,O-dimethyl phosphorodithioate of diethyl mercaptosuccinate  
(1 gallon contains 9.9 pounds of malathion)

## KEEP OUT OF REACH OF CHILDREN CAUTION

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish, aquatic, invertebrates and aquatic life stages of amphibians. For terrestrial uses, do not apply directly to water, or to areas where water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in areas near the application site. Do not contaminate water when disposing of equipment washwaters.

Application may not be made around bodies of water where fish or shellfish are grown and/or harvested commercially. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. Protective information may be obtained from your Cooperative Agricultural Extension Service.

“Certain uses of malathion may be restricted by a U.S. District Court final order. You may refer to the Oregon Department of Agriculture web site at <http://egov.oregon.gov/ODA/PEST/buffers.shtml> or to the U.S. EPA web site at <http://www.epa.gov/espp/wtc/maps.htm#wtc6> or <http://www.epa.gov/espp/wtc/uselimitation.htm> for information regarding pesticides that may be impacted by the final order.”

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. This label and the federal label for this product must be in the possession of the user at the time of pesticide application.

Follow all applicable directions, restrictions and precautions on this Supplemental label and the main EPA-registered label. It is a violation of federal law to use this product in a manner inconsistent with its labeling.

## GRASSHOPPER CONTROL BY AERIAL APPLICATION

### Cottonwood and hybrid Poplar Plantations:

Use 8-12 fluid ounces of Fyfanon ULV per acre for grasshopper control in cottonwood and hybrid poplar plantations. Apply with fixed wing aircraft flying less than 150 mph or helicopter equipped for ultra low volume application. More than one application may be necessary depending upon severity of grasshopper populations and weather conditions. Repeat application as necessary. Application of Fyfanon ULV to bordering rangeland (e.g. 500 feet) at 6-8 fluid ounces per acre will protect the adjacent cottonwood/hybrid poplar plantation from re-infestation by grasshoppers.

The interaction of equipment and weather related factors determines the potential for spray drift. Apply only when weather conditions are favorable. Wind and rising air currents may cause undesirable spray drift and reduce insect control. Temperature inversions can restrict vertical air mixing. Do not make aerial applications during temperature inversions due to the high potential for drift.

### **Precautions/Restrictions:**

- This product may not be applied through any type of irrigation equipment.
