Refer to the EDITION™ BROADSPEC or EDITION™ TANK MIX label and the CLEANWAVE label for information regarding use restrictions, labeled crops, rotational cropping recommendations, sprayer cleanup, use precautions and other information. The most restrictive provisions on either label will apply. Do not use the tank mix if any restrictions on the CLEANWAVE label conflict with the recommendations on the Cheminova label.

SURFACTANTS

Unless otherwise specified, add a Cheminova recommended nonionic surfactant, having at least 80% active ingredient, at 1 to 2 quarts per 100 gallons of spray solution (0.25 to 0.5% v/v) when EDITION™ BROADSPEC or EDITION™ TANK MIX is tank mixed with CLEANWAVE herbicide. Consult your agricultural dealer, applicator, or Cheminova representative for a listing of recommended surfactants. Antifoaming agents may be used if needed. Do not use low rates of liquid nitrogen fertilizer solution as a substitute for surfactant.
